

# Vasiliy Morkovkin

[morkovkin.vv@phystech.edu](mailto:morkovkin.vv@phystech.edu) • [susliko.dev](https://susliko.dev) • [github.com/susliko](https://github.com/susliko)

## Education

**Moscow Institute of Physics and Technology**

*Sep 2016 - Jun 2020 (expected)*

Bachelor of Computer Science

4.4 / 5.0 GPA

## Experience

**Tinkoff.ru** | Software Engineer

*Since Feb 2018 (2 years)*

- Developed services for travellers in functional-style Scala.
- Designed APIs and abstractions, reducing the integration friction.
- Transited from monolith to micro-service Kubernetes-based architecture with the growth of the codebase.
- Promoted the use of asynchronous message-broker based architectures and moving towards the DDD approach.
- Adopted Bazel build system with a fine-grained caching mono-repository approach. This led to an increase in the level of code reuse and reduced build times in several times.
- Popularized functional programming as a highly-composable software engineering tool.
- Mentored new employees.

## Teaching and OSS

- Co-author of a free introduction [course to Scala](#) with approximately 8k enrollments.
- [Speaker](#) at Scala Russia Conference. “Rapid building of admin applications with Server-side Rendering in Scala”.
- Author of an open-source [library](#) for testing concurrent data-structures in Scala.
- Lecturer at Tinkoff Fintech Scala School.

## Programming skills

- *Primary*: Scala, Java.
- *Pet-projects*: Rust, Python, C/C++.
- *Scripting/Reading*: Haskell, Go, JavaScript, Clojure, Lua, Shell.

## Interests

- Database Internals: storage engines, indexing, data integrity mechanisms.
- Distributed Consensus: algorithms and systems based on them (Zookeeper, etcd).
- Distributed Fault-Tolerant Systems: Kafka, Cassandra, Spanner and Calvin-based databases.
