# Vasiliy Morkovkin

morkovkin.vv@phystech.edu • susliko.dev • github.com/susliko

#### **Education**

#### Moscow Institute of Physics and Technology

Sep 2016 - Jun 2020

Bachelor of Computer Science

4.4 / 5.0 GPA

Moscow Institute of Physics and Technology

Sep 2020 - Present

Master of Computer Science

### **Experience**

**<u>Tinkoff.ru</u>** | Software Engineer & Team Lead

Since Feb 2018 (3.5 years)

- Developed services for travellers in functional-style Scala.
- Led a team, interviewed candidates, mentored new employees.
- Designed libraries, APIs and abstractions, reducing the integration friction.
- Transited from monolith to microservice Kubernetes-based architecture with the growth of the codebase.
- Promoted the use of asynchronous message-broker based architectures.
- Adopted Bazel build system with a fine-grained caching mono-repository approach. This led
  to an increase in the level of code reuse and reduced build times in several times.
- Popularized functional programming as a highly-composable software engineering tool.
- Encouraged usage of TLA<sup>+</sup> model-checking for system analysis.

## **Teaching and OSS**

- Co-author of a free introduction course to Scala with 12k enrollments.
- <u>Speaker</u> at Scala Russia Conference. "Rapid building of admin applications with Server-side Rendering in Scala".
- Author of an open-source library for testing concurrent data-structures in Scala.
- Lecturer at Tinkoff Fintech Scala School.

### **Programming skills**

- Primary: Scala, Java, TLA+.
- Pet-projects: Rust, Python, C/C++, Lua.
- Scripting/Reading: Haskell, Go, JavaScript, Clojure, Lua, Shell.

#### Interests

- Database Internals: storage engines, indexing, data integrity mechanisms.
- Distributed Consensus: algorithms and systems based on them (Zookeeper, etcd).
- Distributed Fault-Tolerant Systems: Kafka, Cassandra, Spanner and Calvin-based databases.
